Cóntinuation of 2. NOTE: Proposed changes to claims 36 and 40 raise new issues requiring further consideration and search and does not place the application in a position for allowance. The addition of the recitation "and wherein a basis weight of said mat falls within the range of 68 to 339 gm/square meters." to claims 36 and 40 raises new issues requiring further consideration and/or search because it presents newly claimed embodiments not previously presented.

Continuation of 5. does NOT place the application in condition for allowance because: Casey discloses products that show a 9 to 1, or a 90% machine to cross direction orientation; said products are of weight from 15 to 100 gm/square meter. The products of Casey have a fiber length (not in present claims) as long as 100 mm (page 1131). The Casey reference does not specifically identify the products as "mats", however, when the structure recited in the reference is substantially identical to that of the claims, claimed properties or functions are presumed to be inherent.
